

## Meeting Agenda

Date: 21/5

Facilitator: Laszlo

Participants: Laszlo, Patricia, Sara, Danny

### 1. Objectives

Nothing really is holding us back, just continue working!

### 2. Reports

Danny is working with Copy/Paste. Sara is working with RMText. Patricia is working with RMImage. Documents need to be updated, RAD, SDD etc.

Refactorization: All circular dependencies are solved.. Removed the class Tips and moved some model classes to utils. Made MainView's propertyChange-method more effective, the same goes for ToolbarPanel & MenuBar's actionPerformed.

### 3. Discussion items

(a) Sara wants to test whether the text showing is the same as the text stored in the model, and thus wants getMainView() and getDocCon() methods in MainController, or reach them in some other way. We don't want these methods in MainController. How to solve this??

(b) How do we get the documents? And should we rename the repository Create to ResuMate?

(c) Laszlo and Danny need some rows of code.

### 4. Outcomes and assignments

(a) Laszlo will translate all documents, meeting agendas etc. into English and finish RAD and SDD.

(b) Laszlo will make sure that you can export a Document to PDF.

(c) Laszlo rewrites the README file for the project.

(d) Patricia will make it possible to crop, scale and grayscale the image.

(e) Danny continues with undo/redo.

(f) Sara will update RMText.

## 5. Wrap up

Nothing unresolved. Next meeting tomorrow.
