

## Meeting Agenda

Date: 25/05-2013

Facilitator: Laszlo

Participants: Patricia, Danny, Laszlo, Sara

### 1. Objectives

- Undo/redo is causing problems.
- The Change Template function seems logic but doesn't work.
- We need to work against interfaces to get grade 3!!!

### 2. Reports

- Sara has read the RAD and the SDD and updated them and now knows what needs to be done in that department. We need to write intro in RAD and know which use cases to include. SDD needs more writing about passive MVC.
- Danny has begun with the New Doc use case.
- Patricia has created new models, solved a simpleJFileChooser problem and tried to fix the Change Template use case (the latter isn't finished).
- Laszlo has implemented the functionality to open a PDF after creation in the natively associated application for PDF, e.g. Adobe Reader. Directories can also be opened in the native file explorer. Has started researching how the use cases print and send can be implemented.

Everyone has begun with the presentation.

### 3. Discussion items

- *RAD & SDD*: We need to reprioritize use cases and decide which use cases to include in documentation. Also we need to check if these are up to date. Today everyone reads the RAD and SDD! New STAN, UML and package diagram needed!
- *Project-deadline*: Meeting tomorrow 10:00. Last commit 15:00.
- *Interfaces*: We could have an interface for "subcontrollers", use more polymorphism and an interface for a document. MainViewInterface needs to be reevaluated.
- *Screensize*: The program looks a bit different on very big screens. Needs to be fixed.

### 4. Outcomes and assignments

#### Documentation

- (a) Everyone will read the RAD and SDD today and update it!
- (b) Danny will write the RAD-intro and the presentation-intro today.
- (c) Sara reprioritizes use cases.

- (d) Everyone updates their working use cases today in documentation!
- (e) Diagrams will be updated tomorrow.
- (f) Patricia will write the overview and about passive MVC in SDD.
- (g) Patricia will create sequence diagram for use case Import Image

### **Programming**

- (a) Patricia will try to find a solution for Change Template in 20 min, if none is found it will be dropped.
- (b) Patricia will also create/update interfaces for model and view.
- (c) Laszlo creates an interface for controllers.
- (d) Laszlo will work with the save function.
- (e) Everyone has got to install BugFinder, then: kill bugs!
- (f) Sara will resize GUI-components and make personal information structured with multiple text areas.
- (g) Danny will implement new tab, close tab etc.

### **Presentation**

- (a) Will be in focus tomorrow.

### **5. Wrap up**

- (a) Deadline for last commit will be set tomorrow morning.
- (b) Next meeting: tomorrow sunday 26/5, 10:00, Idéläran.
